Networking overview

Before users log in to Cloud Manager, you'll need to ensure that their web browsers can access specific endpoints. After that, you need to verify networking requirements for the specific type of working environment and services that will be used.

Endpoints accessed from your web browser

Users must access Cloud Manager from a web browser. The machine running the web browser must have connections to the following endpoints:

Endpoints	Purpose
https://cloudmanager.cloud.netapp.com	To connect you to the Cloud Manager SaaS interface.
https://api.services.cloud.netapp.com	To contact Cloud Central APIs.
https://auth0.com https://cdn.auth0.com https://netapp-cloud-account.auth0.com https://services.cloud.netapp.com	Your web browser connects to these endpoints for centralized user authentication through NetApp Cloud Central.
https://widget.intercom.io	For in-product chat that enables you to talk to NetApp cloud experts.
